Provider Guide to Long-Acting Reversible Contraception (LARCs)

ABOUT THIS GUIDE

This resource guide includes information on clinical settings in Philadelphia and surrounding counties that provide long-acting reversible contraception (LARCs). LARCS are the **most effective** contraceptives currently on the market.

Long-acting reversible contraception includes both

- the implant and
- intrauterine devices (IUDs)

FAMILY PLANNING & REPRODUCTIVE LIFE PLAN

A key component of any family planning visit is assessing a client's pregnancy intention and reproductive life plan (RLP). Discussions about a client's RLP include preconception health and contraceptive counseling and are most effective when childbearing plans are discussed on an on-going basis.

Asking about pregnancy plans for the next twelve months at regular and frequent intervals, including during pregnancy, effectively reveals those not actively seeking pregnancy in the next year and prompts further discussion of family planning.

Men, women, and adolescents should all participate in these discussions with their health care providers.

PATIENT ASSISTANCE PROGRAMS

Patient assistance programs for IUDs are available through manufacturers and charitable foundations.

Paragard and Arch Foundation applications are also included in this folder

Clinic Sites with Long-Acting Reversible Contraception Availability

ABOUT THE HEALTH FEDERATION OF PHILADELPHIA

Founded in 1983, the Health Federation of Philadelphia serves as a keystone supporting a network of Community Health Centers as well as the broader base of public and private-sector organizations that deliver health and human services to vulnerable populations. We promote community health by improving access to and quality of health care; by identifying, testing and implementing solutions to health disparities; and by providing training and technical assistance to help other organizations operate more efficiently and effectively.
